Senior Product Designer / Design Systems & UX Foundation

Experience

Postman/ Senior Product Designer

Bengaluru, India / Jun 2022 -

Led and scaled Postman's design system as part of the UX Foundation: built and governed reusable components, improved app performance, embedded with Growth for cohesive experiences, defined Postman Vision 2024, and enabled rapid high-fidelity prototyping via a code-based Postman clone.

Spearheaded 0->1 API observability initiatives: drove hypothesis-led experiments (schema/collection generation, Live Collections, API Design Health), and partnered cross-functionally to validate and iterate on early product direction.

Hypersonix / Senior Product Designer

Remote / Nov 2020 - May 2022

Lead 0->1 development of a data analytics platform MVP--designing workflows for unified enterprise data ingestion, query-driven insight exploration, and rich trend visualizations through rapid ideation, prototyping, and user-informed validation.

Built and owned the company's first design system, Sonic, while leading all product design efforts; scaled the design function by hiring and onboarding designers and drove consistency across emerging features.
